

Prompt for E-commerce Platform Screen Design

Design modern, clean, and user-friendly UI screens for an e-commerce platform. The design should have a minimalistic aesthetic with smooth rounded corners, soft shadows, and a neutral color palette (white, gray, and accent colors like teal or orange). Use a grid-based layout with plenty of spacing.

Include the following screens:

- Home Screen – Top navigation bar with logo, search bar, cart, and profile icon. Hero banner with promotional deals. Sections: 'Trending Products', 'Recommended for You', and 'Top Categories'.
- Product Listing Page – Product cards with image, title, price, rating, and quick add-to-cart button. Filters and sorting options on the left side (price range, categories, brands).
- Product Detail Page – Large product image carousel. Product title, price, stock status, reviews. 'Add to Cart' and 'Buy Now' buttons. Recommendation section: 'Similar Products' and 'Frequently Bought Together'.
- Shopping Cart Page – List of selected items with quantity selector and price. Coupon code input. Order summary with subtotal, shipping, and total price. CTA: 'Proceed to Checkout'.
- Checkout Page – Address input form. Payment method selection (credit card, UPI, wallet, COD). Order review and final 'Place Order' button.

Style Guidelines:

- Use modern typography (e.g., Inter, Poppins, or Roboto).
- Rounded buttons with hover effects.
- Iconography from material/feather icons.
- Smooth animations for transitions.
- Mobile-responsive layout preview.
